

Request for Proposal — Mobile Application Suite

Pacific Coast Foods

RFP number	RFP-2026-MOBI329
Product category	Custom Application Development
Issued	September 18, 2026
Questions due	September 28, 2026
Proposals due	October 18, 2026 by 5:00 PM local time
Anticipated award	November 08, 2026
Anticipated start	November 22, 2026
Estimated budget	\$260,000 – \$600,000

Sample document. This RFP is fictional and was generated for demonstration purposes. All organizations, names, figures, and details are invented and do not represent any real entity, price, or agreement.

1. Introduction

Pacific Coast Foods (a food-processing company with four plants, based in Washington) is seeking proposals from qualified software firms to deliver **Mobile Application Suite** — design and delivery of native-quality mobile applications for frontline and field staff, with reliable offline operation and sync.

This Request for Proposal (RFP) describes our needs, the requirements a solution must meet, and the process for submitting a proposal.

2. Scope of work

The vendor will be responsible for the full delivery lifecycle, including discovery, design, development and configuration, integration, quality assurance, data migration where applicable, training and documentation, and deployment with post-launch support.

The capabilities we expect the solution to provide include:

- Offline-capable data capture with automatic sync
- Task and work-order assignment and tracking
- Photo, signature, and barcode/QR capture
- GPS and location tagging of records
- Push notifications for new assignments
- Supervisor dashboard for field activity

3. Requirements

At minimum, the solution must:

1. Mobile app for field or frontline staff
2. Reliable operation with no or intermittent connectivity
3. Capture of photos, signatures, and scanned codes
4. Real-time visibility of field activity for supervisors
5. Sync of field data into the core system of record
6. Secure sign-in for staff devices

4. Integration requirements

The solution must integrate with our existing systems, including:

- Integration with the core work-order / system of record.

- Integration with the asset or inventory system.
- Integration with the identity provider (SSO).

Vendors should describe their approach to each integration and any assumptions.

5. Security and compliance requirements

The solution must adhere to **SOC 2, WCAG 2.1 AA**, and vendors must describe:

- How data is encrypted in transit and at rest.
- How access is controlled (authentication, single sign-on, and roles).
- Their approach to security testing and vulnerability management.
- How the solution meets the accessibility and compliance frameworks above.

6. Success measures

We will consider this engagement successful if it achieves:

- paper forms eliminated for core field workflows
- field data available in core systems in near real time
- reduction in data-entry errors and rework

7. Proposal requirements

Proposals must include, in order: (1) a cover letter, (2) an executive summary, (3) your understanding of our needs, (4) the proposed solution and technical approach, (5) a project plan and timeline, (6) the project team and key personnel, (7) relevant experience and at least three references, (8) itemized pricing with assumptions, and (9) assumptions, exclusions, and risks.

8. Evaluation criteria

Proposals will be scored on a 100-point scale:

Criterion	Weight
Technical approach and solution fit	30
Relevant experience and past performance	20
Project team qualifications	15
Cost and value	20
Project plan and timeline	10
References	5

9. Submission instructions

- Submit proposals electronically as a single PDF.
- Direct written questions to the contact below by **September 28, 2026**.
- Proposals are due by **October 18, 2026 at 5:00 PM local time**. Late submissions will not be considered.

10. Contact

Primary contact	Andrew Boyd
Title	Chief Information Officer
Organization	Pacific Coast Foods
