Riverside Health Partners

RFP number	RFP-2026-SECU136
Product category	Managed Services & Security
Issued	February 11, 2026
Questions due	February 21, 2026
Proposals due	March 13, 2026 by 5:00 PM local time
Anticipated award	April 03, 2026
Anticipated start	April 17, 2026
Estimated budget	\$90,000 – \$350,000

Sample document. This RFP is fictional and was generated for demonstration purposes. All organizations, names, figures, and details are invented and do not represent any real entity, price, or agreement.

1. Introduction

Riverside Health Partners (a regional network of outpatient clinics, based in Ohio) is seeking proposals from qualified software firms to deliver **Security & Compliance Services** — assessment and hardening of applications and infrastructure against security risk, with support for compliance frameworks such as SOC 2 and HIPAA.

This Request for Proposal (RFP) describes our needs, the requirements a solution must meet, and the process for submitting a proposal.

2. Scope of work

The vendor will be responsible for the full delivery lifecycle, including discovery, design, development and configuration, integration, quality assurance, data migration where applicable, training and documentation, and deployment with post-launch support.

The capabilities we expect the solution to provide include:

- Security assessment of applications and infrastructure
- Penetration testing and remediation guidance
- Secure architecture and code review
- Compliance readiness (SOC 2, HIPAA, and similar)
- Identity, access, and secrets hardening
- Security monitoring and incident-response planning

3. Requirements

At minimum, the solution must:

1. Assess applications and infrastructure for security risk
2. Perform penetration testing and remediation
3. Review architecture and code for vulnerabilities
4. Prepare for a compliance framework (e.g. SOC 2, HIPAA)
5. Harden identity, access, and secrets management
6. Establish security monitoring and incident response

4. Integration requirements

The solution must integrate with our existing systems, including:

- Integration with the application and cloud environment under review.

- Integration with the identity provider (SSO).
- Integration with security monitoring / SIEM tooling.

Vendors should describe their approach to each integration and any assumptions.

5. Security and compliance requirements

The solution must adhere to **SOC 2, ISO/IEC 27001, HIPAA-aligned practices**, and vendors must describe:

- How data is encrypted in transit and at rest.
- How access is controlled (authentication, single sign-on, and roles).
- Their approach to security testing and vulnerability management.
- How the solution meets the accessibility and compliance frameworks above.

6. Success measures

We will consider this engagement successful if it achieves:

- critical and high findings remediated
- compliance readiness demonstrably improved
- security monitoring and incident response in place

7. Proposal requirements

Proposals must include, in order: (1) a cover letter, (2) an executive summary, (3) your understanding of our needs, (4) the proposed solution and technical approach, (5) a project plan and timeline, (6) the project team and key personnel, (7) relevant experience and at least three references, (8) itemized pricing with assumptions, and (9) assumptions, exclusions, and risks.

8. Evaluation criteria

Proposals will be scored on a 100-point scale:

Criterion	Weight
Technical approach and solution fit	30
Relevant experience and past performance	20
Project team qualifications	15
Cost and value	20
Project plan and timeline	10
References	5

9. Submission instructions

- Submit proposals electronically as a single PDF.
- Direct written questions to the contact below by **February 21, 2026**.
- Proposals are due by **March 13, 2026 at 5:00 PM local time**. Late submissions will not be considered.
