

Request for Proposal — Legacy Application Modernization

Franklin County

RFP number	RFP-2026-LEGA986
Product category	Custom Application Development
Issued	April 13, 2026
Questions due	April 23, 2026
Proposals due	May 13, 2026 by 5:00 PM local time
Anticipated award	June 03, 2026
Anticipated start	June 17, 2026
Estimated budget	\$400,000 – \$1,200,000

Sample document. This RFP is fictional and was generated for demonstration purposes. All organizations, names, figures, and details are invented and do not represent any real entity, price, or agreement.

1. Introduction

Franklin County (a county government of roughly 280,000 residents, based in Pennsylvania) is seeking proposals from qualified software firms to deliver **Legacy Application Modernization** — incremental modernization of an aging, hard-to-maintain application onto a supported, cloud-native architecture with no loss of business function.

This Request for Proposal (RFP) describes our needs, the requirements a solution must meet, and the process for submitting a proposal.

2. Scope of work

The vendor will be responsible for the full delivery lifecycle, including discovery, design, development and configuration, integration, quality assurance, data migration where applicable, training and documentation, and deployment with post-launch support.

The capabilities we expect the solution to provide include:

- Assessment of the existing system and modernization roadmap
- Incremental re-platforming (strangler-fig approach)
- Data migration with validation and reconciliation
- Preservation and improvement of existing business rules
- Cloud-native, supportable target architecture
- Parallel-run and cutover planning

3. Requirements

At minimum, the solution must:

1. Replace an unsupported or high-risk legacy application
2. Preserve existing business rules and data
3. Minimize disruption during transition
4. Migrate historical data with validation
5. Move to a supportable, cloud-hosted platform
6. Reduce ongoing maintenance cost and risk

4. Integration requirements

The solution must integrate with our existing systems, including:

- Integration with the legacy database.

- Integration with downstream systems that consume legacy data.
- Integration with the identity provider (SSO).

Vendors should describe their approach to each integration and any assumptions.

5. Security and compliance requirements

The solution must adhere to **SOC 2, WCAG 2.1 AA**, and vendors must describe:

- How data is encrypted in transit and at rest.
- How access is controlled (authentication, single sign-on, and roles).
- Their approach to security testing and vulnerability management.
- How the solution meets the accessibility and compliance frameworks above.

6. Success measures

We will consider this engagement successful if it achieves:

- legacy system retired with no loss of function
- historical data migrated and reconciled
- measurable reduction in maintenance cost and risk

7. Proposal requirements

Proposals must include, in order: (1) a cover letter, (2) an executive summary, (3) your understanding of our needs, (4) the proposed solution and technical approach, (5) a project plan and timeline, (6) the project team and key personnel, (7) relevant experience and at least three references, (8) itemized pricing with assumptions, and (9) assumptions, exclusions, and risks.

8. Evaluation criteria

Proposals will be scored on a 100-point scale:

Criterion	Weight
Technical approach and solution fit	30
Relevant experience and past performance	20
Project team qualifications	15
Cost and value	20
Project plan and timeline	10
References	5

9. Submission instructions

- Submit proposals electronically as a single PDF.
- Direct written questions to the contact below by **April 23, 2026**.
- Proposals are due by **May 13, 2026 at 5:00 PM local time**. Late submissions will not be considered.
