

Request for Proposal — Custom Web Application Platform

Harbor Point Bank

RFP number	RFP-2026-WEB-237
Product category	Custom Application Development
Issued	February 20, 2026
Questions due	March 02, 2026
Proposals due	March 22, 2026 by 5:00 PM local time
Anticipated award	April 12, 2026
Anticipated start	April 26, 2026
Estimated budget	\$220,000 – \$550,000

Sample document. This RFP is fictional and was generated for demonstration purposes. All organizations, names, figures, and details are invented and do not represent any real entity, price, or agreement.

1. Introduction

Harbor Point Bank (a regional community bank, based in Massachusetts) is seeking proposals from qualified software firms to deliver **Custom Web Application Platform** — design and delivery of a custom, cloud-hosted web application built around the organization's specific workflows, users, and data.

This Request for Proposal (RFP) describes our needs, the requirements a solution must meet, and the process for submitting a proposal.

2. Scope of work

The vendor will be responsible for the full delivery lifecycle, including discovery, design, development and configuration, integration, quality assurance, data migration where applicable, training and documentation, and deployment with post-launch support.

The capabilities we expect the solution to provide include:

- Custom workflow and business-process automation
- Role-based dashboards for staff, managers, and executives
- Configurable forms, records, and approval flows
- Reporting and data export
- Responsive design for desktop and tablet
- Full audit trail of records and changes

3. Requirements

At minimum, the solution must:

1. Replace manual or spreadsheet-based processes with a single web application
2. Role-based access for different user groups
3. Configurable approval workflows
4. Reporting and export for leadership
5. Audit trail of all changes
6. Integration with the existing system of record

4. Integration requirements

The solution must integrate with our existing systems, including:

- Integration with the existing system of record.

- Integration with the identity provider (SSO).
- Integration with a reporting / BI tool.

Vendors should describe their approach to each integration and any assumptions.

5. Security and compliance requirements

The solution must adhere to **SOC 2, WCAG 2.1 AA**, and vendors must describe:

- How data is encrypted in transit and at rest.
- How access is controlled (authentication, single sign-on, and roles).
- Their approach to security testing and vulnerability management.
- How the solution meets the accessibility and compliance frameworks above.

6. Success measures

We will consider this engagement successful if it achieves:

- manual/spreadsheet processes replaced by a single application
- reporting cycle time reduced from days to minutes
- adoption by the majority of intended users within one quarter

7. Proposal requirements

Proposals must include, in order: (1) a cover letter, (2) an executive summary, (3) your understanding of our needs, (4) the proposed solution and technical approach, (5) a project plan and timeline, (6) the project team and key personnel, (7) relevant experience and at least three references, (8) itemized pricing with assumptions, and (9) assumptions, exclusions, and risks.

8. Evaluation criteria

Proposals will be scored on a 100-point scale:

Criterion	Weight
Technical approach and solution fit	30
Relevant experience and past performance	20
Project team qualifications	15
Cost and value	20
Project plan and timeline	10
References	5

9. Submission instructions

- Submit proposals electronically as a single PDF.
- Direct written questions to the contact below by **March 02, 2026**.
- Proposals are due by **March 22, 2026 at 5:00 PM local time**. Late submissions will not be considered.
