

Request for Proposal — Data Integration & Pipelines

Cascade Family Medicine

RFP number	RFP-2026-DATA809
Product category	Data & Analytics
Issued	July 16, 2026
Questions due	July 26, 2026
Proposals due	August 15, 2026 by 5:00 PM local time
Anticipated award	September 05, 2026
Anticipated start	September 19, 2026
Estimated budget	\$160,000 – \$450,000

Sample document. This RFP is fictional and was generated for demonstration purposes. All organizations, names, figures, and details are invented and do not represent any real entity, price, or agreement.

1. Introduction

Cascade Family Medicine (a multi-specialty physician group, based in Oregon) is seeking proposals from qualified software firms to deliver **Data Integration & Pipelines** — design and delivery of reliable, monitored data pipelines that move and transform data between systems, eliminating manual exports and dual entry.

This Request for Proposal (RFP) describes our needs, the requirements a solution must meet, and the process for submitting a proposal.

2. Scope of work

The vendor will be responsible for the full delivery lifecycle, including discovery, design, development and configuration, integration, quality assurance, data migration where applicable, training and documentation, and deployment with post-launch support.

The capabilities we expect the solution to provide include:

- Automated extract, transform, and load (ETL/ELT) pipelines
- Scheduled and event-driven data movement
- Data validation and reconciliation
- Error handling, retries, and alerting
- Data lineage and processing audit trail
- Secure handling of sensitive fields

3. Requirements

At minimum, the solution must:

1. Eliminate manual data exports and dual entry
2. Move data automatically between systems on a schedule or event
3. Validate and reconcile data in flight
4. Alert on failures with clear diagnostics
5. Maintain lineage and an audit trail
6. Handle sensitive fields securely

4. Integration requirements

The solution must integrate with our existing systems, including:

- Integration with each source and destination system.

- Integration with the identity provider (SSO).
- Integration with monitoring/alerting channels.

Vendors should describe their approach to each integration and any assumptions.

5. Security and compliance requirements

The solution must adhere to **SOC 2, data-governance and retention policies**, and vendors must describe:

- How data is encrypted in transit and at rest.
- How access is controlled (authentication, single sign-on, and roles).
- Their approach to security testing and vulnerability management.
- How the solution meets the accessibility and compliance frameworks above.

6. Success measures

We will consider this engagement successful if it achieves:

- manual exports and dual entry eliminated
- data moved reliably with reconciliation
- failures surfaced and resolved via alerting

7. Proposal requirements

Proposals must include, in order: (1) a cover letter, (2) an executive summary, (3) your understanding of our needs, (4) the proposed solution and technical approach, (5) a project plan and timeline, (6) the project team and key personnel, (7) relevant experience and at least three references, (8) itemized pricing with assumptions, and (9) assumptions, exclusions, and risks.

8. Evaluation criteria

Proposals will be scored on a 100-point scale:

Criterion	Weight
Technical approach and solution fit	30
Relevant experience and past performance	20
Project team qualifications	15
Cost and value	20
Project plan and timeline	10
References	5

9. Submission instructions

- Submit proposals electronically as a single PDF.
- Direct written questions to the contact below by **July 26, 2026**.
- Proposals are due by **August 15, 2026 at 5:00 PM local time**. Late submissions will not be considered.

10. Contact

Primary contact	Robert Chen
Title	VP of Operations
