

Request for Proposal — Enterprise Systems Integration

Riverside Health Partners

RFP number	RFP-2026-SYST284
Product category	Integration & APIs
Issued	June 15, 2026
Questions due	June 25, 2026
Proposals due	July 15, 2026 by 5:00 PM local time
Anticipated award	August 05, 2026
Anticipated start	August 19, 2026
Estimated budget	\$190,000 – \$550,000

Sample document. This RFP is fictional and was generated for demonstration purposes. All organizations, names, figures, and details are invented and do not represent any real entity, price, or agreement.

1. Introduction

Riverside Health Partners (a regional network of outpatient clinics, based in Ohio) is seeking proposals from qualified software firms to deliver **Enterprise Systems Integration** — integration of disparate enterprise systems into coordinated, automated workflows that eliminate manual hand-offs and dual data entry.

This Request for Proposal (RFP) describes our needs, the requirements a solution must meet, and the process for submitting a proposal.

2. Scope of work

The vendor will be responsible for the full delivery lifecycle, including discovery, design, development and configuration, integration, quality assurance, data migration where applicable, training and documentation, and deployment with post-launch support.

The capabilities we expect the solution to provide include:

- Point-to-point and hub-based integration
- Automated cross-system workflows
- Data mapping and transformation
- Reliable messaging with retries and dead-letter handling
- Monitoring and reconciliation across systems
- Documentation of every interface

3. Requirements

At minimum, the solution must:

1. Connect disparate systems into coordinated workflows
2. Eliminate manual hand-offs and dual data entry
3. Map and transform data between systems
4. Guarantee reliable delivery with retries
5. Monitor and reconcile cross-system data
6. Document all interfaces

4. Integration requirements

The solution must integrate with our existing systems, including:

- Integration with each system being connected.

- Integration with the identity provider (SSO).
- Integration with monitoring/alerting channels.

Vendors should describe their approach to each integration and any assumptions.

5. Security and compliance requirements

The solution must adhere to **SOC 2, data-governance and retention policies**, and vendors must describe:

- How data is encrypted in transit and at rest.
- How access is controlled (authentication, single sign-on, and roles).
- Their approach to security testing and vulnerability management.
- How the solution meets the accessibility and compliance frameworks above.

6. Success measures

We will consider this engagement successful if it achieves:

- manual hand-offs and dual entry eliminated
- cross-system workflows automated and monitored
- every interface documented and reconciled

7. Proposal requirements

Proposals must include, in order: (1) a cover letter, (2) an executive summary, (3) your understanding of our needs, (4) the proposed solution and technical approach, (5) a project plan and timeline, (6) the project team and key personnel, (7) relevant experience and at least three references, (8) itemized pricing with assumptions, and (9) assumptions, exclusions, and risks.

8. Evaluation criteria

Proposals will be scored on a 100-point scale:

Criterion	Weight
Technical approach and solution fit	30
Relevant experience and past performance	20
Project team qualifications	15
Cost and value	20
Project plan and timeline	10
References	5

9. Submission instructions

- Submit proposals electronically as a single PDF.
- Direct written questions to the contact below by **June 25, 2026**.
- Proposals are due by **July 15, 2026 at 5:00 PM local time**. Late submissions will not be considered.
