Anticipated start	December 01, 2026
Estimated budget	\$120,000 – \$480,000

Sample document. This RFP is fictional and was generated for demonstration purposes. All organizations, names, figures, and details are invented and do not represent any real entity, price, or agreement.

1. Introduction

Riverside Health Partners (a regional network of outpatient clinics, based in Ohio) is seeking proposals from qualified software firms to deliver **Application Managed Services** — ongoing operation, support, monitoring, and enhancement of an existing application under a defined service-level agreement.

This Request for Proposal (RFP) describes our needs, the requirements a solution must meet, and the process for submitting a proposal.

2. Scope of work

The vendor will be responsible for the full delivery lifecycle, including discovery, design, development and configuration, integration, quality assurance, data migration where applicable, training and documentation, and deployment with post-launch support.

The capabilities we expect the solution to provide include:

- 24/7 monitoring and incident response
- Tiered support with defined SLAs
- Patching, updates, and dependency management
- Backlog of enhancements and small changes
- Performance and cost optimization
- Regular service reviews and reporting

3. Requirements

At minimum, the solution must:

1. Ongoing support and maintenance of an application
2. Defined service levels and response times
3. Proactive monitoring and incident response
4. Regular patching and updates
5. A path for enhancements and small changes
6. Transparent reporting on service performance

4. Integration requirements

The solution must integrate with our existing systems, including:

- Integration with the application's cloud environment.

- Integration with monitoring/alerting and ticketing tools.
- Integration with the identity provider (SSO).

Vendors should describe their approach to each integration and any assumptions.

5. Security and compliance requirements

The solution must adhere to **SOC 2, ISO/IEC 27001**, and vendors must describe:

- How data is encrypted in transit and at rest.
- How access is controlled (authentication, single sign-on, and roles).
- Their approach to security testing and vulnerability management.
- How the solution meets the accessibility and compliance frameworks above.

6. Success measures

We will consider this engagement successful if it achieves:

- service levels met or exceeded each period
- incidents resolved within target response times
- a steady stream of enhancements delivered

7. Proposal requirements

Proposals must include, in order: (1) a cover letter, (2) an executive summary, (3) your understanding of our needs, (4) the proposed solution and technical approach, (5) a project plan and timeline, (6) the project team and key personnel, (7) relevant experience and at least three references, (8) itemized pricing with assumptions, and (9) assumptions, exclusions, and risks.

8. Evaluation criteria

Proposals will be scored on a 100-point scale:

Criterion	Weight
Technical approach and solution fit	30
Relevant experience and past performance	20
Project team qualifications	15
Cost and value	20
Project plan and timeline	10
References	5

9. Submission instructions

- Submit proposals electronically as a single PDF.
- Direct written questions to the contact below by **October 07, 2026**.
- Proposals are due by **October 27, 2026 at 5:00 PM local time**. Late submissions will not be considered.
