

OFFERING DATASHEET

Business Intelligence & Dashboards

Self-service dashboards your business teams actually use.

Sample content. Aventra Software Group is a fictional company used for demonstration. Every organization, figure, client, and outcome in this document is invented and does not describe any real entity or engagement.

Offering ID	bi-dashboards
Product line	Data & Analytics
Best fit for	retail, financial services, manufacturing, healthcare, education, government, nonprofit
Compliance frameworks	SOC 2, WCAG 2.1 AA
Pricing model	Fixed price by workstream, invoiced on milestones
Indicative range	\$150,000 – \$400,000
Typical duration	5 months

Scope

Design and delivery of governed, self-service dashboards and reporting that give business users answers without waiting on IT.

Capabilities delivered

Describe these in the proposed-solution section of a response.

- Executive and operational dashboards
- Self-service reporting for business users
- Governed metric definitions everyone shares
- Scheduled and ad-hoc report export
- Drill-down from summary to detail
- Role-based access to sensitive views

Requirements this offering answers

If an RFP asks for these, this offering is the right match.

- Replace static reports with interactive dashboards
- Let business users answer their own questions
- Agree on shared, governed metric definitions
- Support scheduled and ad-hoc exports
- Enforce role-based access to sensitive data
- Connect to existing data sources

Integrations

Name the buyer's actual systems when the RFP identifies them; these are the fallback.

- The data warehouse or source systems
- The identity provider (SSO)
- Email/scheduling for report delivery

Differentiators

- Governed metrics prevent duplicate, conflicting definitions
- Designed for adoption — business users, not just analysts

Success measures buyers care about

Mirror these in an executive summary when the RFP states similar goals.

- Static reports replaced by interactive dashboards
- Self-service adoption by business teams
- A shared, governed set of metric definitions in use

Approved positioning language

Adapt the wording to the buyer's own terms; keep the substance intact.

Understanding of needs

Leaders wait on IT for static reports, and different teams define the same metric differently. You want governed, self-service dashboards people trust and actually use.

Proposed solution

We will deliver executive and operational dashboards on a governed set of metric definitions, with self-service exploration, drill-down, and scheduled exports — designed for adoption by business users, with role-based access to sensitive views.
