

OFFERING DATASHEET

Cloud Migration

Move to the cloud with a plan, not a leap of faith.

Sample content. Aventra Software Group is a fictional company used for demonstration. Every organization, figure, client, and outcome in this document is invented and does not describe any real entity or engagement.

Offering ID	cloud-migration
Product line	Cloud & Platform Engineering
Best fit for	financial services, healthcare, government, manufacturing, education, retail
Compliance frameworks	SOC 2, ISO/IEC 27001
Pricing model	Fixed price per phase, invoiced on milestones
Indicative range	\$200,000 – \$700,000
Typical duration	8 months

Scope

Assessment, planning, and execution of a migration from on-premises or legacy hosting to a modern, cost-efficient cloud environment.

Capabilities delivered

Describe these in the proposed-solution section of a response.

- Migration assessment and readiness roadmap
- Landing-zone and network design
- Infrastructure-as-code environment build
- Application migration and validation
- Cost optimization and right-sizing
- Cutover and rollback planning

Requirements this offering answers

If an RFP asks for these, this offering is the right match.

- Move applications off on-premises or legacy hosting
- Design a secure, well-architected cloud landing zone
- Migrate with minimal downtime
- Optimize and forecast cloud cost
- Provide infrastructure-as-code for repeatability
- Plan cutover and rollback

Integrations

Name the buyer's actual systems when the RFP identifies them; these are the fallback.

- Existing on-prem systems during transition
- The identity provider (SSO)
- Monitoring and cost-management tooling

Differentiators

- Well-architected landing zone from day one, not retrofitted
- Cost modeling so the cloud bill holds no surprises

Success measures buyers care about

Mirror these in an executive summary when the RFP states similar goals.

- Applications migrated with minimal downtime
- A secure, repeatable landing zone in infrastructure-as-code
- Cloud cost forecasted and optimized

Approved positioning language

Adapt the wording to the buyer's own terms; keep the substance intact.

Understanding of needs

You are moving off aging on-premises or legacy hosting and need a migration that is secure, low-risk, and cost-predictable — not a leap of faith.

Proposed solution

We start with an assessment and readiness roadmap, design a well-architected landing zone, build it as infrastructure-as-code, and migrate applications in planned waves with validation, cost optimization, and rollback plans at each cutover.
