

OFFERING DATASHEET

Enterprise Data Warehouse

One governed source of truth for your data.

Sample content. Aventra Software Group is a fictional company used for demonstration. Every organization, figure, client, and outcome in this document is invented and does not describe any real entity or engagement.

Offering ID	data-warehouse
Product line	Data & Analytics
Best fit for	healthcare, financial services, manufacturing, retail, education, government
Compliance frameworks	SOC 2, data-governance and retention policies
Pricing model	Fixed price by workstream, invoiced on milestones
Indicative range	\$300,000 – \$900,000
Typical duration	9 months

Scope

Consolidation of data from multiple source systems into a governed cloud data warehouse with a documented, trustworthy data model.

Capabilities delivered

Describe these in the proposed-solution section of a response.

- Automated data pipelines from all major source systems
- Governed, documented data model and definitions
- Role-based access to sensitive data
- Data-quality monitoring and alerting
- Historical and point-in-time reporting
- Foundation for BI, analytics, and AI

Requirements this offering answers

If an RFP asks for these, this offering is the right match.

- Consolidate data from many disconnected systems
- Establish a governed single source of truth
- Automate slow, manual reporting pulls
- Enforce role-based access to sensitive data
- Monitor and alert on data quality
- Support historical and point-in-time analysis

Integrations

Name the buyer's actual systems when the RFP identifies them; these are the fallback.

- Each core operational system
- The identity provider (SSO)
- The BI / dashboard tool

Differentiators

- Governed, documented model — analysts trust the numbers
- Cloud-native warehouse scales without re-platforming

Success measures buyers care about

Mirror these in an executive summary when the RFP states similar goals.

- At least eight source systems consolidated
- Reporting time reduced from days to minutes
- A single, documented source of truth adopted across teams

Approved positioning language

Adapt the wording to the buyer's own terms; keep the substance intact.

Understanding of needs

Your data is spread across many systems, reporting is slow and manual, and teams argue about whose numbers are right. You need one governed source of truth.

Proposed solution

We will build a cloud-native data warehouse fed by automated pipelines from your source systems, on a documented and governed data model with role-based access and data-quality monitoring — the trustworthy foundation for reporting, analytics, and AI.
