

OFFERING DATASHEET

Custom Web Application Platform

A tailored web application built around your workflows.

Sample content. Aventra Software Group is a fictional company used for demonstration. Every organization, figure, client, and outcome in this document is invented and does not describe any real entity or engagement.

Offering ID	web-app-platform
Product line	Custom Application Development
Best fit for	financial services, manufacturing, nonprofit, government, education
Compliance frameworks	SOC 2, WCAG 2.1 AA
Pricing model	Fixed price by workstream, invoiced on milestones
Indicative range	\$220,000 – \$550,000
Typical duration	7 months

Scope

Design and delivery of a custom, cloud-hosted web application built around the organization's specific workflows, users, and data.

Capabilities delivered

Describe these in the proposed-solution section of a response.

- Custom workflow and business-process automation
- Role-based dashboards for staff, managers, and executives
- Configurable forms, records, and approval flows
- Reporting and data export
- Responsive design for desktop and tablet
- Full audit trail of records and changes

Requirements this offering answers

If an RFP asks for these, this offering is the right match.

- Replace manual or spreadsheet-based processes with a single web application
- Role-based access for different user groups
- Configurable approval workflows
- Reporting and export for leadership
- Audit trail of all changes
- Integration with the existing system of record

Integrations

Name the buyer's actual systems when the RFP identifies them; these are the fallback.

- The existing system of record
- The identity provider (SSO)
- A reporting / BI tool

Differentiators

- Built around your actual workflows, not a rigid off-the-shelf template
- You own the source code and infrastructure outright

Success measures buyers care about

Mirror these in an executive summary when the RFP states similar goals.

- Manual/spreadsheet processes replaced by a single application
- Reporting cycle time reduced from days to minutes
- Adoption by the majority of intended users within one quarter

Approved positioning language

Adapt the wording to the buyer's own terms; keep the substance intact.

Understanding of needs

You need a single, purpose-built web application that replaces manual and spreadsheet-based work, gives each role the view it needs, and produces reliable reporting for leadership.

Proposed solution

We will design and build a custom web application shaped around your workflows: configurable forms and approval flows, role-based dashboards, a complete audit trail, and reporting your team can run without IT. It is cloud-hosted and integrates with your existing system of record.
