

OFFERING DATASHEET

Enterprise Systems Integration

Make the systems you already own work together.

Sample content. Aventra Software Group is a fictional company used for demonstration. Every organization, figure, client, and outcome in this document is invented and does not describe any real entity or engagement.

Offering ID	systems-integration
Product line	Integration & APIs
Best fit for	healthcare, financial services, manufacturing, retail, education, government
Compliance frameworks	SOC 2, data-governance and retention policies
Pricing model	Fixed price by workstream, invoiced on milestones
Indicative range	\$190,000 – \$550,000
Typical duration	7 months

Scope

Integration of disparate enterprise systems into coordinated, automated workflows that eliminate manual hand-offs and dual data entry.

Capabilities delivered

Describe these in the proposed-solution section of a response.

- Point-to-point and hub-based integration
- Automated cross-system workflows
- Data mapping and transformation
- Reliable messaging with retries and dead-letter handling
- Monitoring and reconciliation across systems
- Documentation of every interface

Requirements this offering answers

If an RFP asks for these, this offering is the right match.

- Connect disparate systems into coordinated workflows
- Eliminate manual hand-offs and dual data entry
- Map and transform data between systems
- Guarantee reliable delivery with retries
- Monitor and reconcile cross-system data
- Document all interfaces

Integrations

Name the buyer's actual systems when the RFP identifies them; these are the fallback.

- Each system being connected
- The identity provider (SSO)
- Monitoring/alerting channels

Differentiators

- Reliable messaging with retries and reconciliation, not fragile scripts
- Every interface documented and monitored

Success measures buyers care about

Mirror these in an executive summary when the RFP states similar goals.

- Manual hand-offs and dual entry eliminated
- Cross-system workflows automated and monitored
- Every interface documented and reconciled

Approved positioning language

Adapt the wording to the buyer's own terms; keep the substance intact.

Understanding of needs

Your systems don't talk to each other, so staff re-key data and coordinate by email and spreadsheet. You need them integrated into reliable, automated workflows.

Proposed solution

We will integrate your systems with reliable messaging, data mapping and transformation, and automated cross-system workflows — with retries, reconciliation, monitoring, and full interface documentation so the integrations stay dependable.
